CARDEXCHANGE® BRIDGE

Seamlessly connect and synchronize credential data across all your systems with CardExchange® Bridge.

CardExchange® Bridge is a powerful integration platform that enables organizations to manage and synchronize credential data effortlessly.

It connects various data sources, allowing seamless communication between identity management systems, access control platforms, HR databases, and other enterprise applications. Whether you need to update records, automate workflows, or ensure data consistency, Bridge provides a reliable, scalable solution to keep your operations running smoothly.

No more manual updates or scattered information—Bridge automates data synchronization, reducing errors and keeping your credential management simple, secure, and efficient.

WHY CHOOSE CARDEXCHANGE® BRIDGE?

- **Keep Your Data in Sync** – Automate updates and eliminate inconsistencies.
- **Secure Your Information** – End-to-end encryption for reliable data protection.
- **Integrate Seamlessly** – Connect cloud, on-premise, and hybrid environments.
- **Reduce Manual Work** – Automate workflows and free up valuable time.
- **Scalability for Any Organization** – Choose the right plan as your needs grow.

CHOOSE A PLAN THAT FITS YOUR NEEDS

>>> LITE

For small organizations managing up to 500 records. Ideal for basic data synchronization, CSV imports, and small image files. Free plan includes 1,000 transactions per month.

>>> MEDIUM

Perfect for businesses managing up to 10,000 records. Supports multiple data sources and allows exporting to back-office systems like access control.

>>> BUSINESS

Our most popular plan for medium to large businesses handling large volumes of photos and transactions.

>>> POWER

Designed for large institutions managing 50,000+ records. Provides unlimited access, automated workflows, and full back-office connectivity.

BRIDGE EDITIONS FEATURES

Finding the right edition to meet your needs should be easy. Our comparison chart is an easy way to select the perfect edition for you. Need help finding the right edition? Contact us and we would be happy to go over your needs and help you get the perfect solution to meet your needs.

WHY CHOOSE CARDEXCHANGE® BRIDGE?

■ FLEXIBLE INTEGRATION OPTIONS

- **Bridge Connect** – A plug-and-play solution that allows you to link your systems quickly using pre-built connectors. Ideal for organizations that need a fast, hassle-free way to synchronize data without requiring complex development work.
- **Bridge API** – A robust and developer-friendly API that enables businesses to build fully customized integrations. Designed for IT teams looking for flexibility and control, the API allows direct communication between CardExchange® Cloud Suite and your internal applications.

■ EFFORTLESS DATABASE CONNECTIVITY

- **Incoming Connections** – Easily pull data from external sources such as HR systems, access control platforms, or membership databases into CardExchange® Cloud Suite. This ensures all credential data remains centralized, accurate, and automatically updated without manual entry.
- **Outgoing Connections** – Seamlessly push credential data to third-party applications, including visitor management, payroll, and access control systems. Bridge ensures that any updates, activations, or deactivations in the Cloud Suite are instantly reflected across all connected platforms, maintaining data consistency and security.
